

Android Usability

6.04.01 Calendar

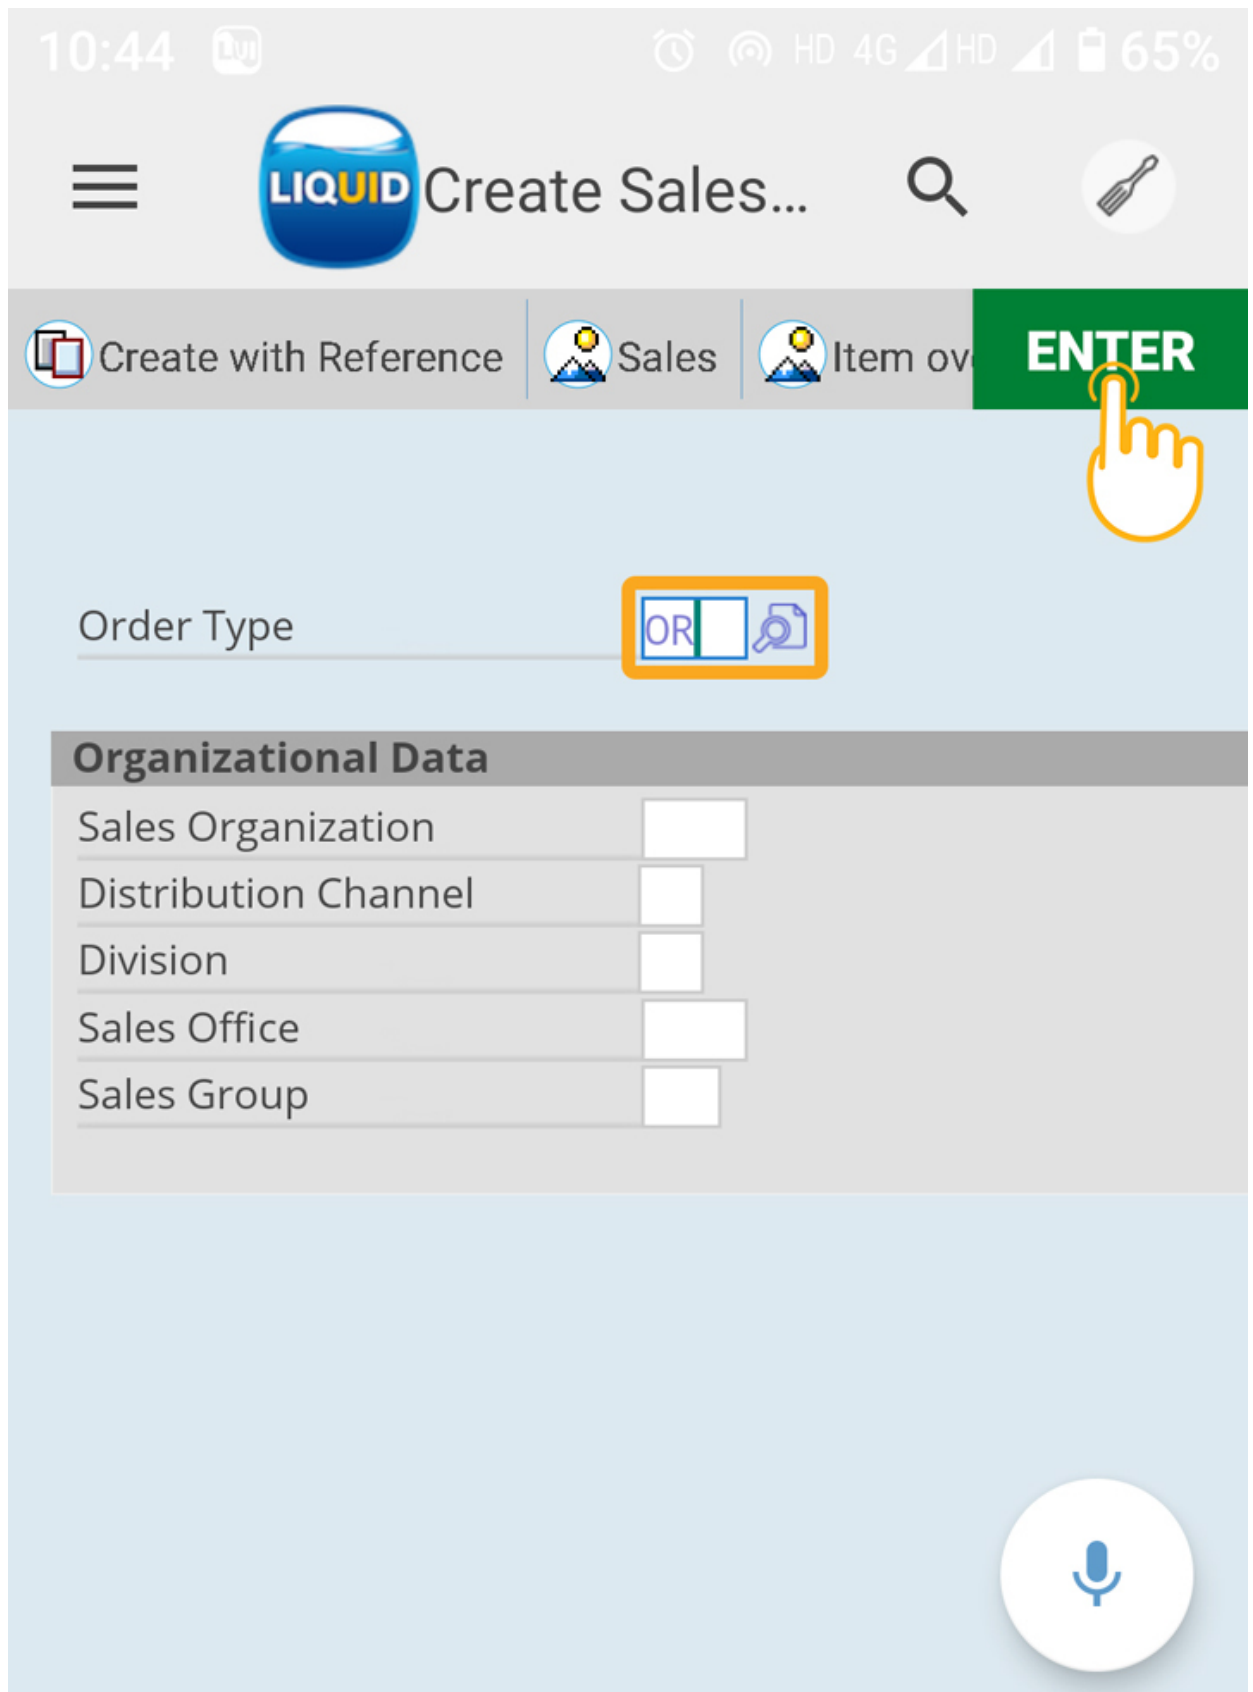

In SAP GUI, you can view a calendar by pressing F4 on certain fields. The resulting calendar appears as follows:

However, the calendar appears differently in Liquid UI. To demonstrate the calendar feature in Liquid UI for Android, we'll walk you through the following:

1. Navigate to the **VA01** transaction, and enter **OR** in the **Order Type** Input Field; click **ENTER**.

Android Usability

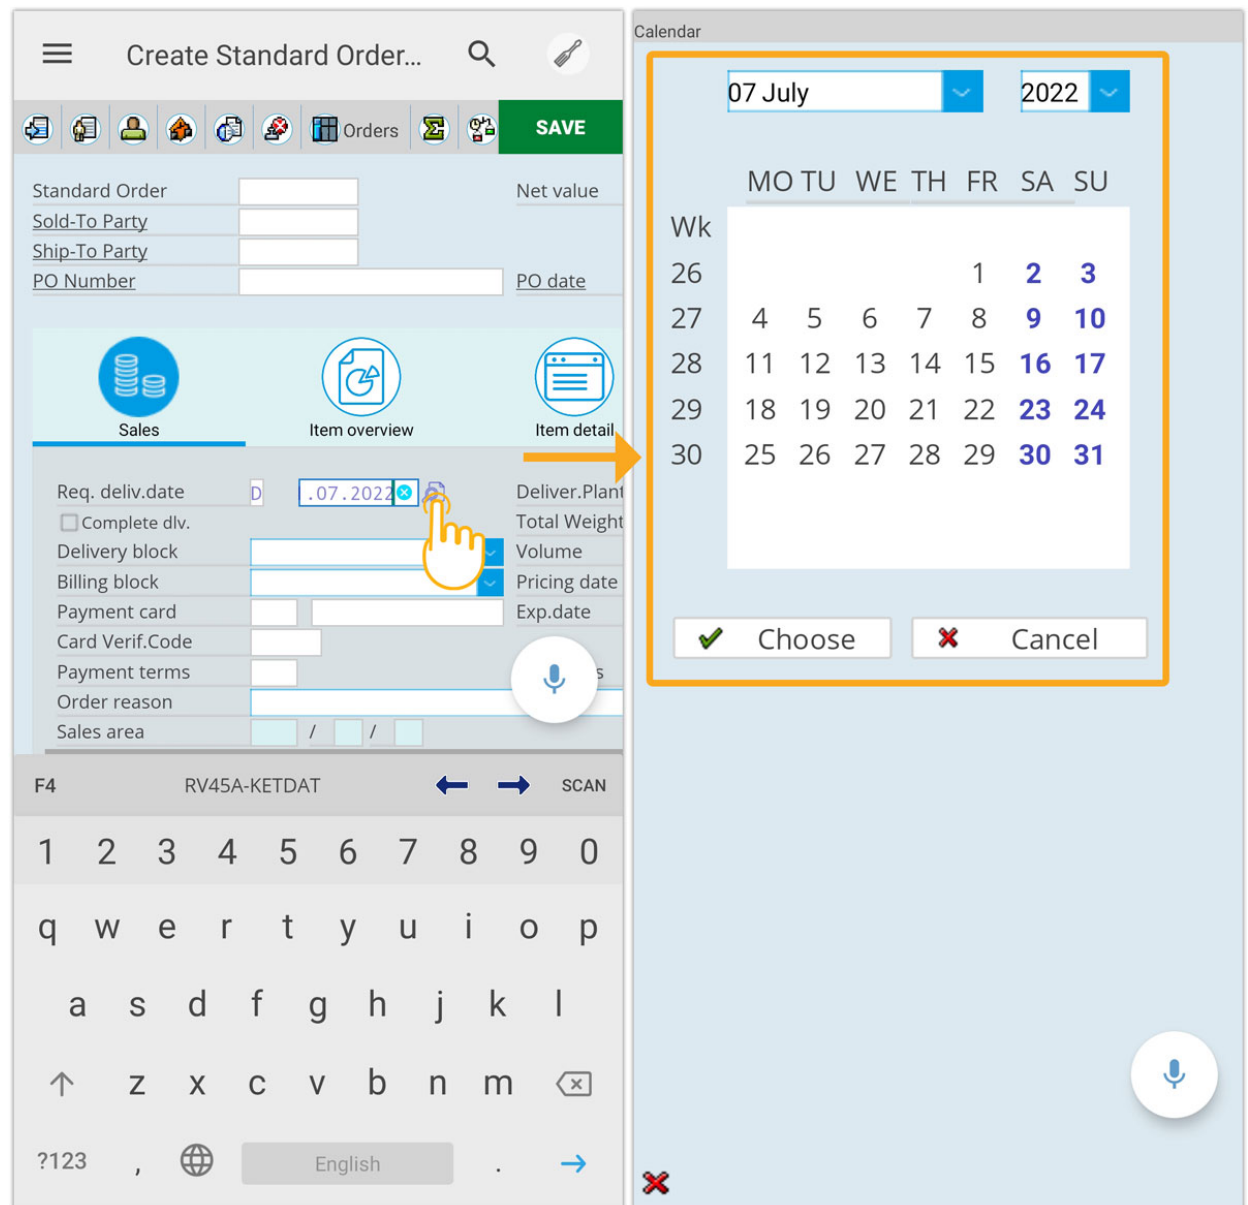

2. Now, the Create Standard Order: Overview screen appears. Placing the cursor on the **Reg. deliv. date** Input Field will display a magnifying glass

Page 2 / 5

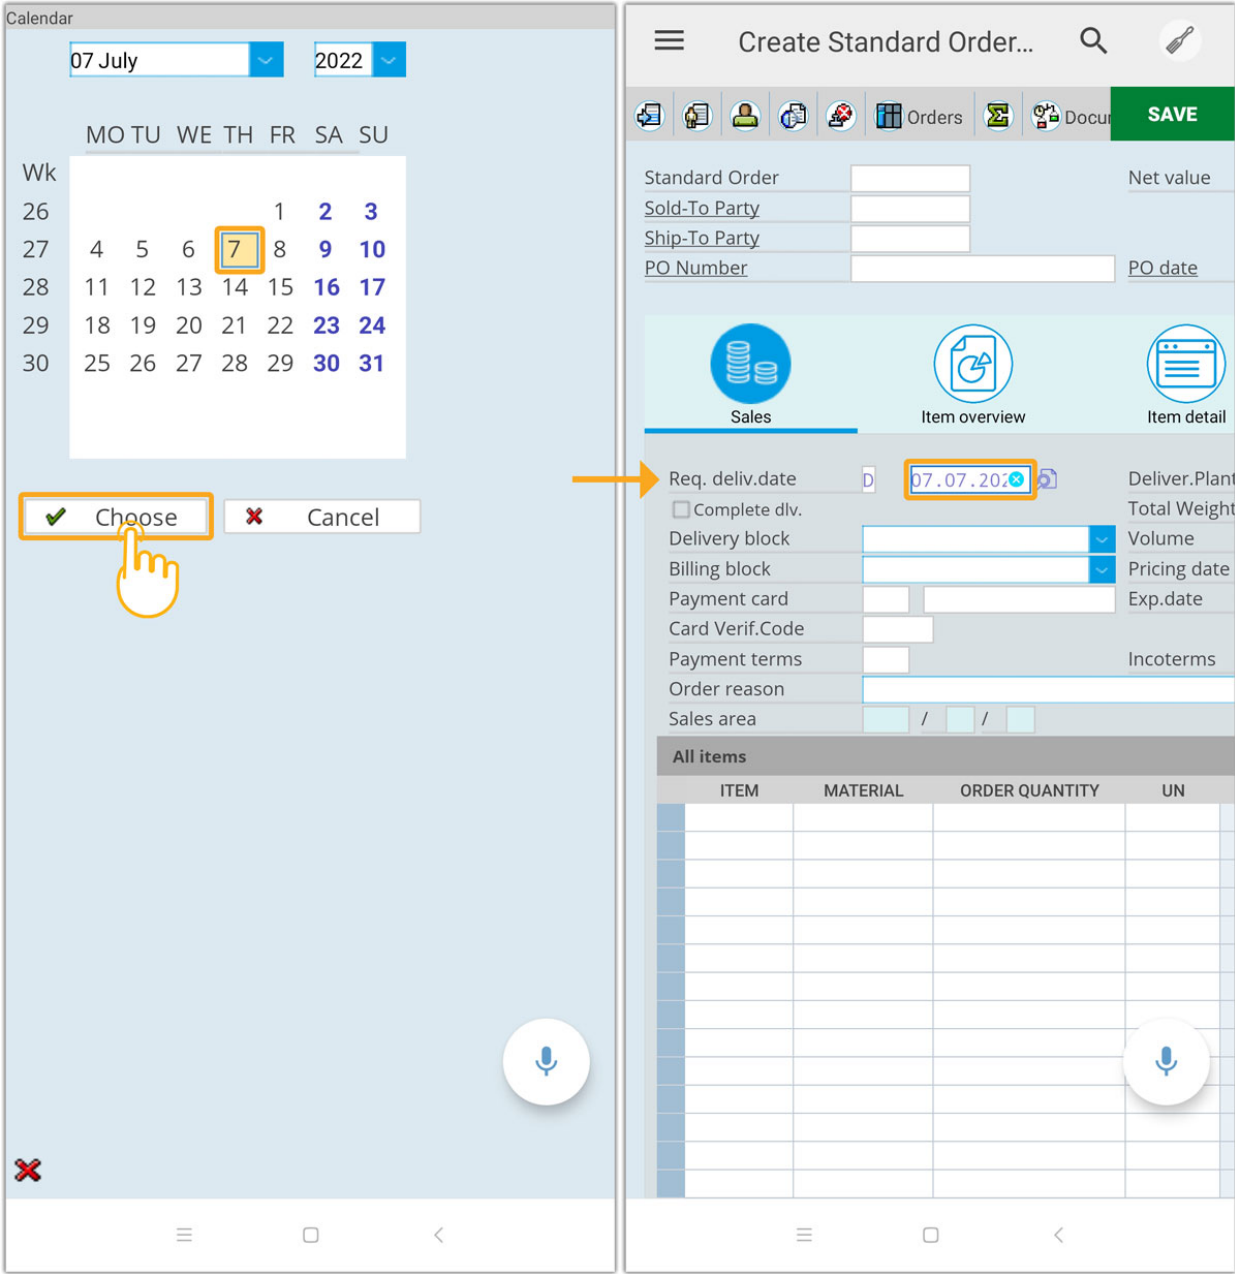

Android Usability

icon. Clicking on **F4** will show the Calendar, as shown below.

- Now, select the desired date from the calendar. Clicking **Choose** option will populate the date details in **Reg. deliv.date** field, as shown below.
