

iOS Introduction

2.3.09 Electronic Signature Support

Purpose

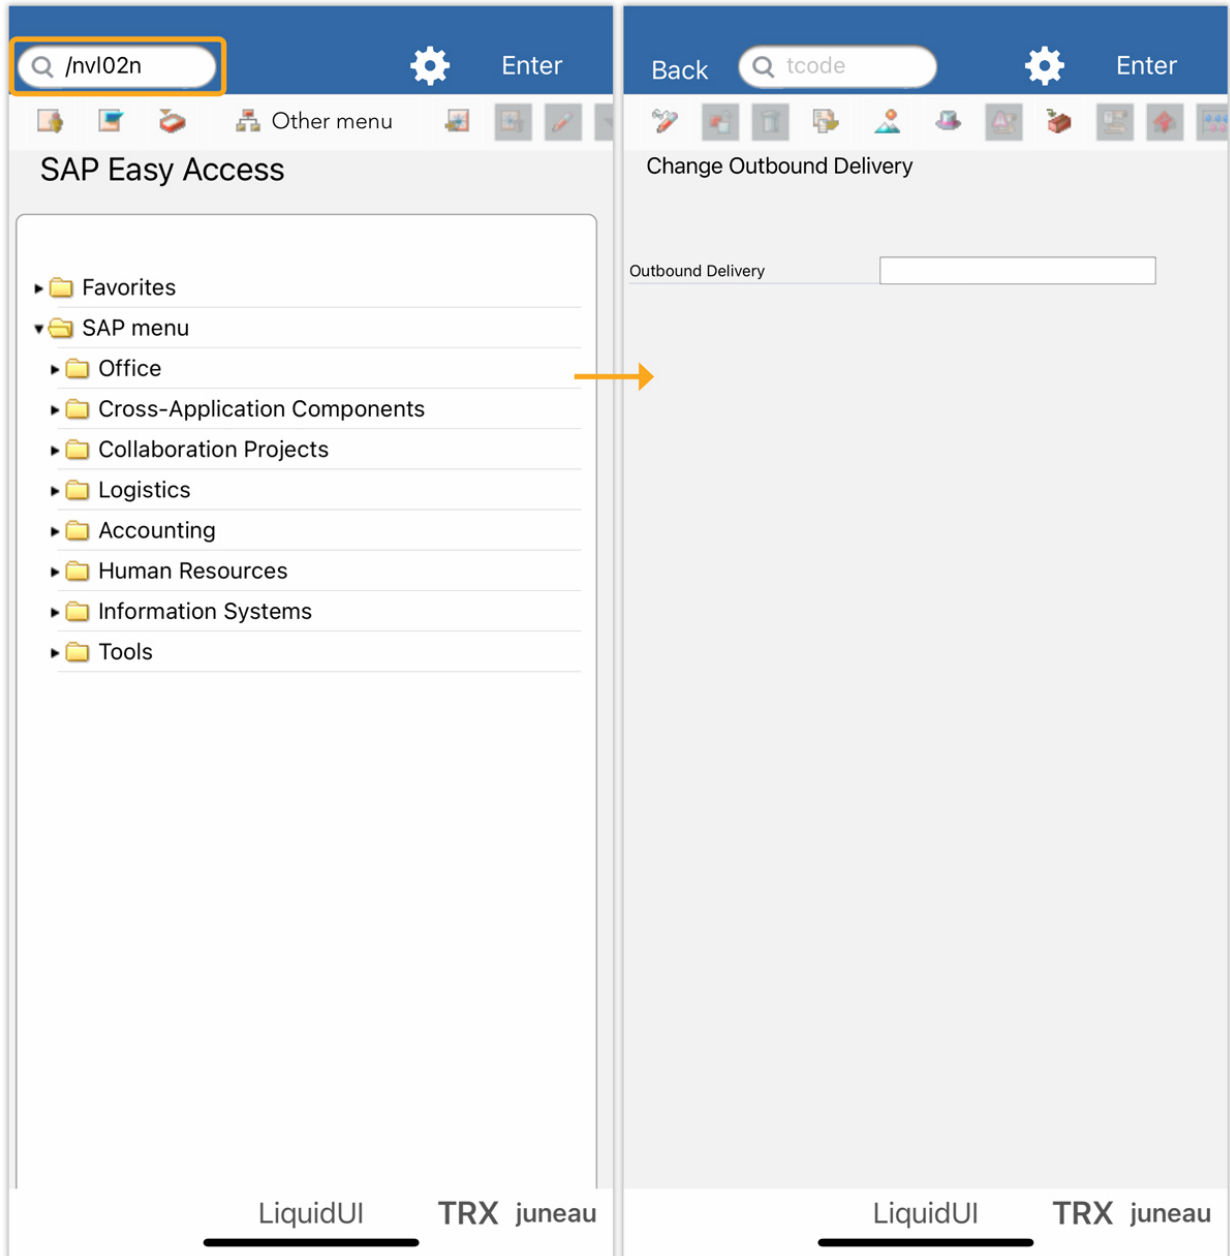

The Electronic signature feature of Liquid UI makes it easy and convenient for users to sign a document. It enables users to access and sign documents securely directly within SAP transactions. This eliminates time-consuming paper processes and administrative burdens, streamlining the review process. Thus, improving your process efficiency by adding signature support right within SAP.

User Interface

In this article, we'll showcase how to use the electronic signature feature considering the **Change Outbound Delivery** screen (VL02N) and attach a signature file to the transaction.

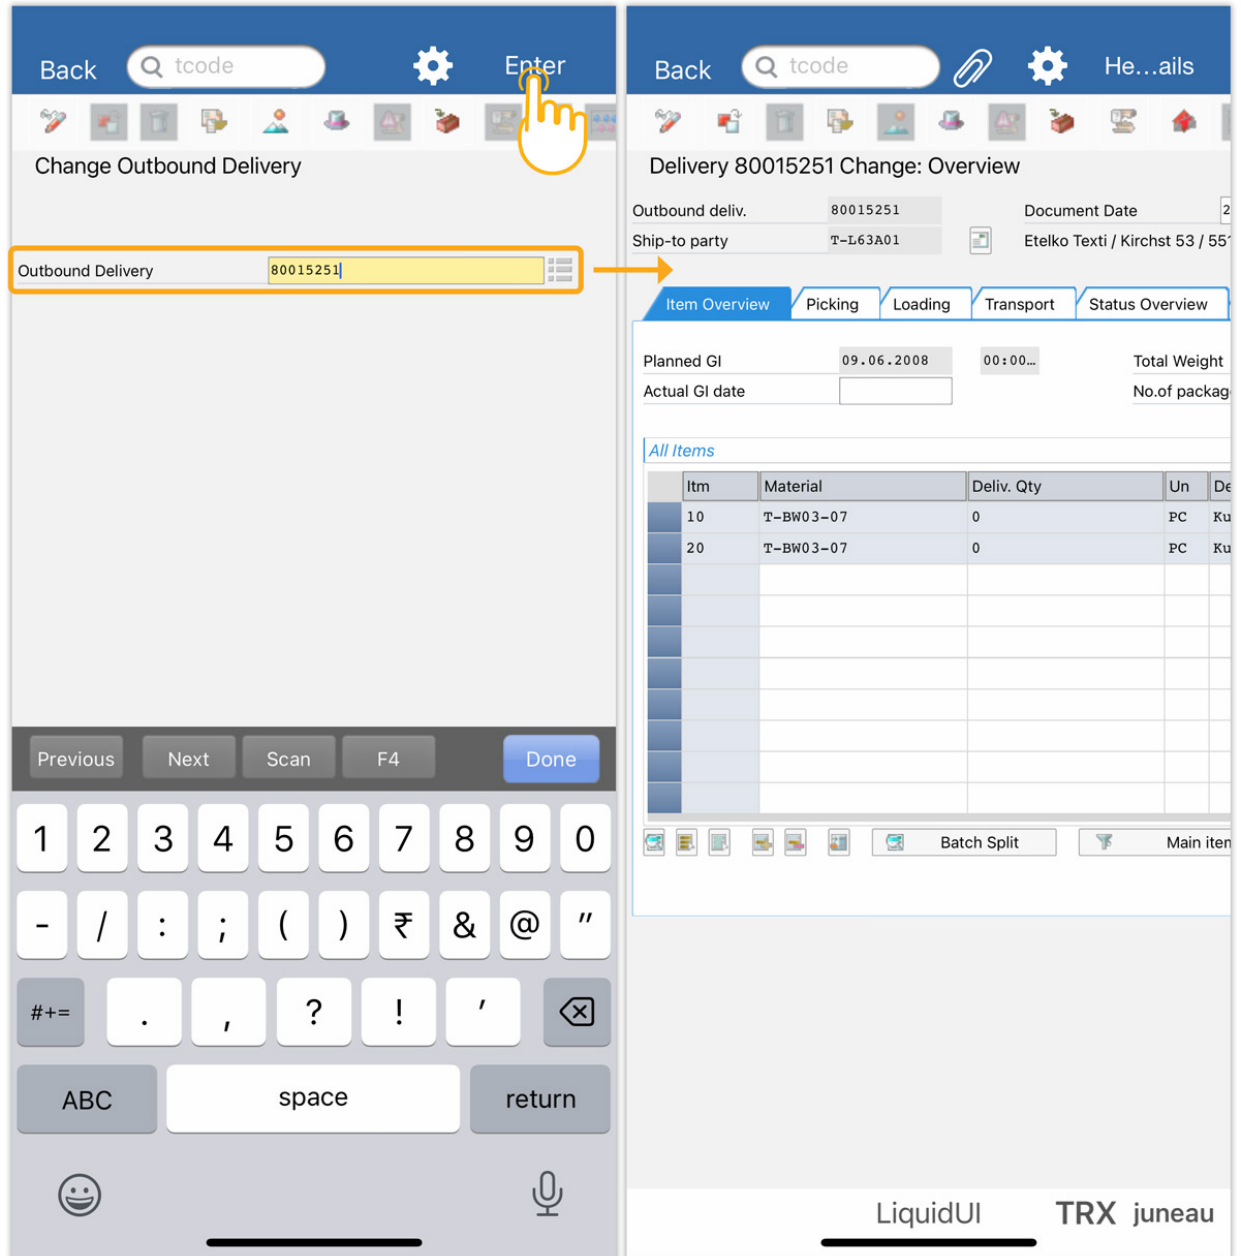

1. Log into SAP and navigate to the **VL02N** transaction.

iOS Introduction

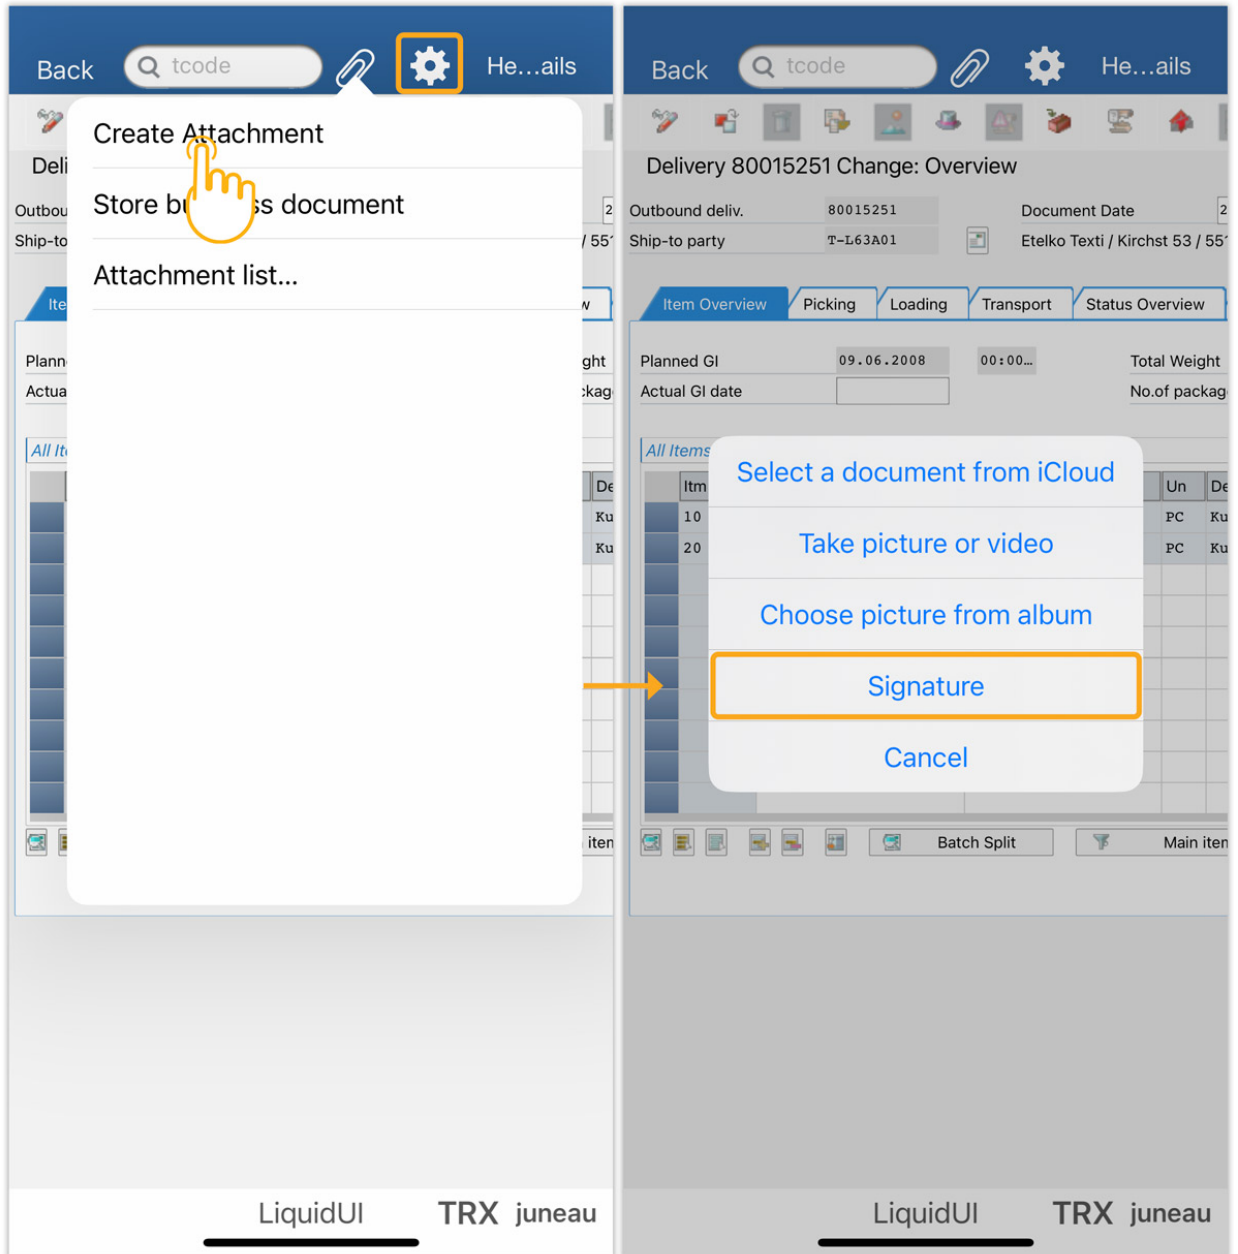

2. Enter the **Outbound Delivery** number and click **Enter** to proceed.

iOS Introduction

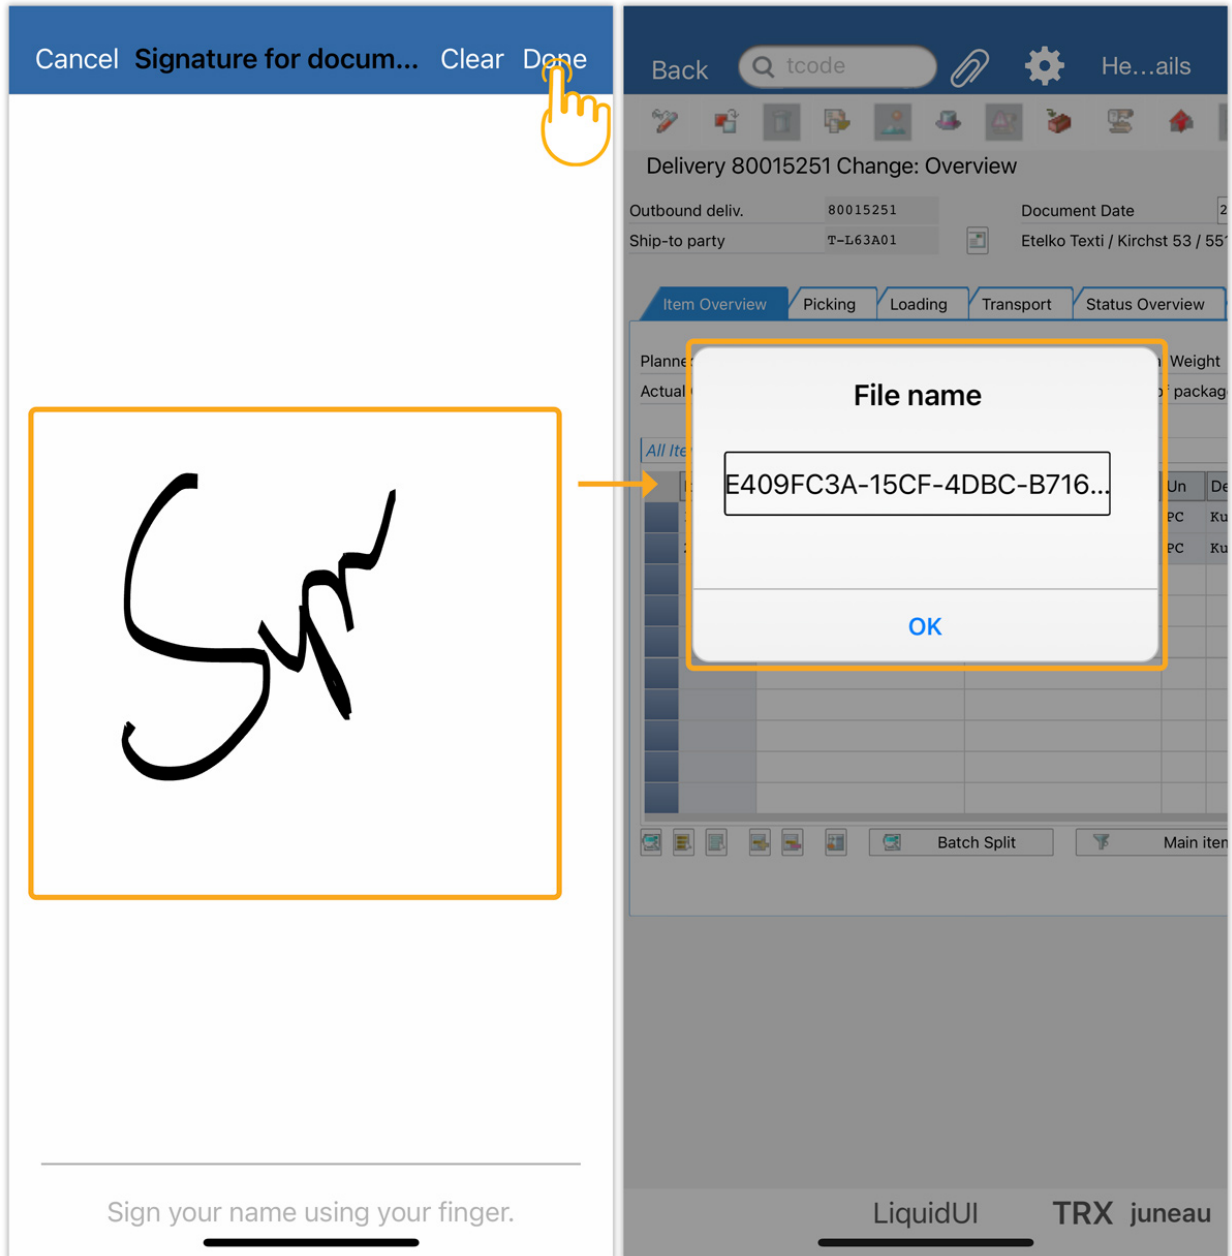

3. Click the **Attachment** symbol, then **Create Attachment**, and choose the **Signature** option, as shown below.

iOS Introduction

- Using your finger sign on the digital pad. Tap **Done** to view the file name. If necessary, modify the signature file name, then click **OK** to save it as an attachment.
