iOS Installation
3.1 System Requirements

Before you install the Liquid UI Client on your iOS device, you must ensure that your device supports Liquid UI for iOS. Synactive recommends you follow the below system requirements for installing the Liquid UI Client.

Liquid UI Client

- iPad, iPhone, or iPod Touch with iOS 8.0 or above
- Network speed (uses TCP/IP): 50 kbps
- 50MB free space
- Valid Liquid UI license
- Network connectivity to connect to either of the following:
    - SAP ERP application server
    - Liquid UI Server

SAP Customization for iOS

The following items are necessary for customizing your SAP:

- Valid [Liquid UI Server](#) and Liquid UI Client licenses
- Liquid UI Developer Toolkit

Liquid UI Server

To perform customizations, you need to have a Liquid UI Server installed on your desktop. Refer to the [Liquid UI Server installation requirements](#) for complete details.
