# 4.04 Themes

The 2.0.13.0 release of Liquid UI for iOS includes following themes. Themes enable you to change the look and feel of the user interface. Currently there are four available themes that Synactive provides with Liquid UI, although additional themes will be released in future.

To access themes on Liquid UI for iOS, click on the connection type, which is on the bottom right side of the screen. A context sensitive window will pop-up.
Select **Theme Selection** to apply background theme for your Liquid UI App.

The currently available themes are as follows.

- **iClassic**
  The Classic theme is the original theme for Liquid UI for iOS. The Classic theme appears as shown below.
